**Subject:** RE: Possum Point Electrical pole clearances

Wayne,

Would you be up for a visit to Bremo Thursday morning to take a look at that project? We can discuss Possum at that time as well. I see you have 10:00am call. I have my weekly Bremo call at 10 as well. Maybe we could leave around 7:30am get to the site look around and then take our 10am calls and then leave. We can drive separately as well if that makes more sense.

Thanks,

Mike

Wayne,

What day after Tuesday would be good for you to talk?

Thanks,

Mike

**Subject:** FW: Possum Point Electrical pole clearances  
**Importance:** High

Mike, the clearance info is coming in a separate email, let's have a call next week about setting up 'new' project for the structures out of scope of my rebuild effort. Let me know if you want me to schedule. Debbie Asby needs to be included, she is my financial analyst. Thanks Wayne

**Subject:** Possum Point Electrical pole clearances

Wayne,

You may have sent them but have you sent the clearances Glover needs to maintain around the poles in Pond ABC at Possum? We are planning to commence dewatering next week and mechanical dredging probably 2 to 3 weeks after that time. You had also mentioned that the relocation of these poles in order to get the rest of the ash out would become a new project. I would like to begin those discussions too. Ultimately, I would want to clear those areas for you so that you can install new poles and once they are set have my civil crew scoop out the ash around the old poles. I understand this may take some time, but I want to stand ready in the event some can move faster than others.

Thanks,

*Mike Glagola*
